

Group 4

Abarquez, Jean Khlady Stefanie
Baetiong, Tonee
Corotan, Jemina

Abular, Miguel Khristian
Calupaz, Andrew
Rembulat, Joshua

Overview

The purpose of this educational website is for the beginner who wants to start their journey as a front-end developer. To begin their (your) journey as a front-end developer, you must need a strong foundation of HTML, CSS, and JavaScript. They can build a simple website with only HTML and CSS, and if they want to have an interaction like clicking some button, alerting when there is an error, they will need to use JavaScript. Also, if they wanted to save some data, they needed to use server-side scripting like PHP / Node.JS and MySQL to store some data.

Scope & Limitations:

The scope of our website is only the fundamentals of HTML, CSS, and JavaScript. And Limitation is server-side scripting.

Company Name/Title: FrontDev

Description: FrontDev is about creating a website from scratch, but before that, you need to know the fundamentals of the website, the fundamentals of creating a website are HTML, CSS, and JavaScript. This platform will guide you through the basics of creating a simple website. Also, this is a free learning guide for beginners like you.
